

The Lighthouse Accessibility Guide

The Lighthouse has one room that is suitable for older or less agile guests who use walking aids and/or a wheelchair part time. Our accessible room and facilities at The Lighthouse can accommodate either one or two people on a double or twin basis as required.

General Access

The room has two doors that allow easy access with a wheelchair and/or walking aids into the room. One door provides access from the Disabled parking bay situated opposite the Stables Accommodation block on the red tarmac driveway. Measuring 97cm (38") this door permits access from the car park directly into the bedroom.

The other door, measuring 81 cm (32"), provides access from the bedroom into the Stables Accommodation corridor that leads to the Lounge and Café Nouveau.

Bedroom Facilities

The room contains a super king size zip and link bed, 183cm x 190cm (6' x 6'3") and 62cm (24") high, which can be made up into a super king size bed or split into two twin beds if preferred. Wheelchair access is permitted around the bed.

There are two bedside cabinets with reading lamps on top, plus a long desk with drawers set into a recess, with a kettle and hospitality tray on top. The room also has a wardrobe for clothes, footwear and suitcases situated next to the door that opens on to the Stables corridor, and a chair that fits under the desk.

En-Suite Facilities

The bedroom has a 3 meter square en-suite wet room fitted with shower, sink and toilet. The toilet has room for a side transfer from the left, with grab rails fitted on both sides.

The shower has a fold down seat and grab rail, with side access to the left. There is a low level shelf for toiletries on the right hand side of the seat and low level controls for the shower to the left.

The sink has a low level shelf for toiletries to its left and a single lever tap for ease of use. There is a swing top bin next to the toilet and another low level shelf near the toilet.

Reception

The side door in the Stables corridor provides a level route to the Lighthouse Entrance and Reception, situated on the other side of the gravelled Courtyard through the main Reception doors, 87cm (34') wide. Here guests have access to an accessible toilet just off the entrance foyer, as well as the main Reception where guests can check in. Guests can access the Lounge from Reception via 3 steps up into the lounge, which are fitted with rails on either side.

The Lounge

The Lounge can be accessed at the end of the Stables corridor by three steps leading up through the doorway, with a grab rail fitted on the right hand side as you enter. Breakfast is served in the Breakfast Lounge, which is all on the same level.

Café Nouveau

Level access to the Café can be obtained via a short external route from the end of the Stables corridor around to the external café door, measuring 90cm (35") and 96cm (38") respectively, enabling guests to enter the Café and Breakfast Lounge for breakfast and other refreshments.
